MESSAGE FROM THE PRESIDENT

Dear friends,

More than 90 years ago, the Sisters of St. Joseph of Carondelet founded Mount Saint Mary’s to empower women to reach their greatest potential. They had such faith in their mission that they were unstoppable. We are grateful for their example, now, more than ever.

Because we believe the time has come for us to make a tremendous new investment in our students.

On Nov. 11, 2017 — during a special celebration with hundreds of Mount Saint Mary’s alumnae, faculty, staff, students and longtime friends — we publicly launched the largest comprehensive fundraising campaign in Mount Saint Mary’s history, with a goal to raise $100 million for the University by the end of 2020.

This campaign will enable us to expand our rigorous academic programs; redouble our efforts for the advancement of women; send our students to study around the world; fund vital scholarships; and build a state-of-the-art Wellness Pavilion, the first new construction on our Chalon Campus in more than 30 years.

One hundred million dollars is an ambitious goal, yes, but we believe it is a necessary one if we truly want to support the current and future needs of our students, our communities and our world. We also believe this is an attainable goal, because we know that we have the most dedicated, dynamic supporters a university could ever hope for.

Thanks to generous lead gifts from some truly cherished friends, foundations and corporations, we are well on our way. While we have much to cheer, much work remains. I am confident because I know that our campaign’s long-term success is in very good hands. Yours.

We cannot do this alone. Together, though, we can start a bold new chapter in the history of Mount Saint Mary’s University and empower new generations of unstoppable students. Thank you for joining us in this mission.

Sincerely,

Ann McElaney-Johnson

Ann McElaney-Johnson
At Mount Saint Mary’s University, we know that education changes lives. We’ve seen it time and time again in the lives of our students. Their stories move us. Their ambitions challenge us. Their triumphs inspire us.

— President Ann McElaney-Johnson

What is transformative about the Mount Saint Mary’s experience? Phylizia Carrillo ’17 can tell you. She graduated this year with a degree in global politics. “Who I am today is a world different from who I was as a freshman,” Carrillo says. “When I arrived, I wasn’t sure if I was academically fit enough for this school.”

That feeling did not last long. Carrillo took advantage of every opportunity afforded her. She served in student government, attended women’s leadership conferences, studied abroad, completed internships in the California State Senate and the L.A. Mayor’s Office, and organized the first student-led TEDx Talk at the University.

Today, Carrillo is a confident, prepared leader committed to improving the lives of women and girls around the world. She has already completed a fellowship as a policy analyst in the Philippines, chairs an L.A.-based initiative of the World Economic Forum, and was recently hired as the director of innovation for a global strategies firm that focuses on technology to effect positive change.

“At the Mount, we enter with a perspective of the world as it is, and then we’re challenged in our classrooms and our communities to envision the world as it could be,” Carrillo says. “Here, I learned the value of a women’s-focused education, and it’s made me a force to be reckoned with.”

To learn more about the transformative power of a university education, watch our videos introducing “An Unstoppable Campaign for Mount Saint Mary’s.”

msmu.edu/campaign
Expanding programs in science, technology, engineering and math. Creating more real-world research opportunities in the sciences and the liberal arts. Advancing women and promoting gender equity beyond campus. Connecting our students to the world — and bringing the world to our students. These are just a few of the big ideas we have in mind when it comes to enhancing educational excellence at Mount Saint Mary’s.

This fall, Mount Saint Mary’s is publicly launching a five-year, $100 million comprehensive campaign that — among other things — will allow us to expand our rigorous academic programming to create new opportunities for generations of unstoppable students.

We begin with STEM. Women are woefully underrepresented when it comes to fields such as math and science — fields with increasingly sought-after and high-paying occupations. We want to help fill that pipeline with a new generation of brilliant STEM leaders — women from Mount Saint Mary’s University.

We have already produced hundreds of graduates who are thriving and advancing new ideas in the fields of biological and physical sciences. With your help, we can open up new opportunities for our students to pursue careers in computer science and engineering. We can also help train the next generation of STEM educators who can serve as mentors and role models for girls who have an interest in math and science.

Another key goal of this campaign is to fulfill our vision of graduating globally educated, culturally fluent leaders who will change the world. Through our Center for Global Initiatives, we want to send more of our students out into the world to participate in international internships and service learning, and to study abroad. We believe that in order to change the world, you must first see it — and understand it.

We also want more of our undergraduate students to have the opportunity to conduct original, faculty-mentored research. Already, Mount Saint Mary’s students are conducting real-world research that is producing a positive impact on topics as varied as community public health efforts in Tanzania and Peru, the quality of Southern California’s waterways, local human trafficking laws, and vocational trade opportunities in Los Angeles.

Read on to learn more about how our campaign will equip our students and faculty with the resources they need to succeed.

We have to keep funding programs that support women in STEM fields. We have to encourage women to be scientists, to follow their dreams, to stay in science. ... Studies in the STEM areas are challenging for everyone; it was definitely challenging for me. The nice thing about the Mount is that the environment here is incredibly supportive and nurturing. I benefited from it, it served me well, and it’s going to continue supporting women for generations to come.”

Chamelli Jhappan ’79
Program Director, Cancer Immunology, Hematology and Etiology Branch of the National Cancer Institute, NIH

SUCCESS IN STEM FIELDS
Research is the most high-impact experience for a STEM major, says Eric Stemp, PhD, the Loring-Denault Endowed Chair in Chemistry and chair of the mathematics and physical sciences department.

“The more we can engage our students in research and the more meaningful that research can be, the more we can see the difference that it makes in their lives,” says Stemp.

Here at the Mount, undergraduate students are challenged to do their own original research and to collaborate on their professors’ projects. They have hands-on access to modern equipment such as a nuclear magnetic resonance (NMR) instrument, a gas chromatograph–mass spectrometer (GC-MS), and a nanosecond transient absorption spectrometer. Every year, they are invited to present their research at local or national conferences. And every year, many of them move on to graduate school or medical school to advance their future careers in STEM fields.

“A lot of our students have gone on to great places like Stanford and Harvard,” says Stemp. “The Mount has an established track record with helping students succeed in the traditional STEM program.”
**President’s Report and Honor Roll of Donors 2016–2017**

**3,308**

**STUDENTS ENROLLED ON BOTH CAMPUSES.**
We have 31 academic undergraduate programs and 10 graduate programs.

**$30M**

**CAMPAIGN GOAL FOR EDUCATIONAL EXCELLENCE.**
Our students benefit from research opportunities, global exchange and women’s leadership programs.

---

**INTERSECTION OF STUDIES**

Through one extraordinary alliance, students in an interdisciplinary research project traveled thousands of miles and crisscrossed subjects in the STEM fields to study community health in California and Peru.

“It was an invaluable experience and really brought the classes alive,” says Elizabeth Shokoya ’19. “Learning about other cultures makes you appreciate what you have and helps you become more compassionate.”

The partnership between the Mount’s biological and political science departments began two semesters ago. Students took a “Cancer and Society” course that covered the molecular, environmental and nutritional causes of cancer. Then they studied the “Politics of Peru,” examining disparities in policy and healthcare access in California and Peru.

Summer 2017 brought a 10-day trek to Peru, where students visited hospitals and schools, interviewing women about health factors and their use of traditional remedies.

Back home, the team is still compiling and interpreting data, studying correlations between the cervical cancer rate in women in Peru’s indigenous population and in women living in poorer communities of Los Angeles.

Shokoya, a biochemistry major and international relations minor, believes that studying the sciences at a leading liberal arts university represents the best of both worlds.

“Interdisciplinary work broadens your perspective on life and your career,” Shokoya says.

---

**OFFERING INSIGHT AND SOLUTIONS**

Students and faculty are also conducting original research for several of Mount Saint Mary’s new public centers, including the Center for the Advancement of Women, the Center for Academic Innovation and Creativity, and the CSJ Institute.

“As a women’s university, it’s imperative that we understand the forces that are at work in women’s lives. In order to do that, research is at the heart of our work,” says Emerald Archer, PhD, director of the Center for the Advancement of Women.

“Research gives us the lay of the land so that we can understand where women are excelling, where women are underrepresented, and the barriers that women face in their everyday lives. By tracking these changes and trends, we can better offer solutions to help ensure that women and girls flourish everywhere.”

“Interdisciplinary work broadens your perspective on life and your career,” Shokoya says.
At Mount Saint Mary’s, we believe it is our responsibility to respond to the needs of the times, and the times are calling for strong, confident and resilient leaders. Our unique Mount Wellness movement will make the University a model for healthy living, and our example will lead the way for colleges and universities across the nation. All our wellness movement needs now is a home.

The University is planning its first major construction on the Chalon Campus in more than 30 years. The Wellness Pavilion will be a hub for health, sports, stress reduction and more — everything students need to master the art of living vigorously.

“We see the pavilion as the centerpiece of our Mount Wellness initiative,” says Bryant Adibe, MD, the University’s chief wellness officer. “We know it’s going to encourage our students to be more physically active. It’s going to encourage them to sleep better, manage their stress better and eat better, as well. So we have all these initiatives coming together under one roof, and we couldn’t be more thrilled about it.”

Our Mount Wellness movement is inspired by a sobering fact: two-thirds of our students report that they enter their university years feeling unhealthy. That is especially discouraging because research shows that students who feel healthier do better academically, have a greater drive to achieve and have higher degree aspirations.

Our challenge is to flip that statistic on its head: By 2025, our goal is for at least two-thirds of Mount Saint Mary’s students to feel healthy by the time they graduate. And our new Wellness Pavilion can help us achieve that goal.

That space will be home to a physical therapy advanced training lab, multipurpose spaces for educational programming, training rooms, a true fitness center, exercise studios, an improved pool and a gymnasium for club sports teams. There will be a multimedia wall, healthy food choices, social spaces, and a sleep studio for students to improve in all areas of wellness. And our peer wellness advocates will have access to a dynamic wellness hub that they can use to help Mount students achieve their personal health goals.

“This is more than a building. It’s more than a gym,” says Alison Halpern, the University’s wellness manager. “There will be something for everyone in the Wellness Pavilion.”
Planned site of the Wellness Pavilion.
Right now, we have about 3,000 square feet of indoor activity space. The Wellness Pavilion will give us more than 10 times the amount of space we have now!”

Autumn Johnson
Director of Sports and Wellness

How exciting is that — to have the opportunity to be part of this big project that will benefit current and future students of the Mount. I chose to donate to the Wellness Pavilion specifically because it will provide students with the facility that will help them have that balance in their lives.”

Rhea de Guzman ’06
Alum and donor

A HOLISTIC APPROACH TO WELLNESS

A wellness movement that takes care of communities — whether it’s a community of students, of faculty and staff, of families, of neighbors — is how Leah FitzGerald, dean of nursing, sees the Mount’s wellness movement extending beyond our campuses.

“As low as 50 percent of the population is having preventative screenings done, depending on what age group you’re looking at. I think that we can play a huge role in that part of wellness,” she says.

The nursing program has always had a focus on prevention and on wellness, guided by the Roy Adaptation Model’s holistic approach to healthcare. And now that philosophy, pioneered by our very own Sister Callista Roy, CSJ, is guiding the wellness movement as well.

“The students will learn how to care for others, but more importantly, how to care for themselves,” says FitzGerald. “They will have an awareness of their own wellness and how to reduce their stress. This will improve their quality of life.”
Great leaders need to be healthy because it will allow them to stay focused and to concentrate on what matters most to them. And I think the wellness movement will help students take that step forward.”

Arlene Valdes ’19
Nursing major

Her own experience with reshaping her life into one that is healthier and less stressed inspired Yoselin Castillo-Yip ’19 to become an ambassador of wellness. This fall, Castillo-Yip joined the inaugural cohort of Peer Wellness Advocates, a group of students specially trained to educate their peers and inspire others to take ownership of their wellness.

“I think that we can definitely make a difference in how students view their health and how they make choices,” says Castillo-Yip, a student in the master of science in counseling psychology program.

After finishing an intensive and comprehensive leadership training at the beginning of the semester, the advocates are now certified peer educators. They continue to receive weekly advanced training in the four Mount Wellness areas — move more, eat green, sleep well and de-stress — as they prepare to meet individually with their student clients in the spring. Through one-on-one coaching, programs, workshops and outreach, the advocates will help others make healthy lifestyle choices and motivate their peers to achieve their wellness goals.

They will also benefit from in-person visits and virtual lectures from the Mount’s wellness scholar in residence, Dr. Wayne Scott Andersen, a New York Times bestselling author and health pioneer.

“Being able to make an impact in somebody’s life — that really motivates me to stay healthy and continue to inspire others to stay healthy as well,” Castillo-Yip says.
We are proud to be a leading women’s university that attracts young women with all kinds of dreams. We are inspired by the fact that many of our students are the first in their families to go to college. And we are in awe of the sacrifices that many of our students and their families make in order to be here. That’s why we intend to build our endowment — to ensure that every student who is ready for the Mount Saint Mary’s experience can realize their dreams.

At Mount Saint Mary’s, our foundation is built on the knowledge that women are capable of greatness. We believe that women should have the opportunity to contribute their talents at every level of society. In order for that to happen, we must advocate for them. And that includes boosting their ability to attend the university that will help them reach their goals.

Finances should never be a barrier to an education. That’s why student scholarships are vital to our efforts to bring the brightest and the best to Mount Saint Mary’s, regardless of our students’ financial backgrounds.

“Our students deserve a fair chance,” says Amanda Romero ’04, PhD, chair of sociology. “These young women work really hard and they often carry very large loads, because they care a lot about their families and their work.”

We also know that student scholarships produce an amazing return on investment for our communities: nurses, teachers, entrepreneurs, public servants, scientists, social workers and more. Thanks to scholarship support, our students become graduates. And our graduates become forces for good in their professions and in communities around the world.

Francesca Martin ’18 says she entered the Mount as a shy, insecure student. Now, as a senior, she views herself as a leader, a scholar and an agent of change. The philosophy major plans to go on to earn her PhD and become a professor and writer.

“The reason I can attend the Mount is because of the scholarships I have received, and I am so grateful for this opportunity,” Martin says. “The Mount has truly shaped me into the person I am today. Coming here was, and is, one of the best decisions of my life.”
Numbers and algorithms are beautiful to Gladys Olivares ’17, a math major with a minor in fine art selected for several scholarships, including the Edison International Expendable Scholarship and the Los Angeles Philanthropic Foundation Scholarship.

“The more you know about math, the more you’ll understand the world around you,” she says. Originally a nursing major, she credits her professors for helping her find her passion in math. Olivares, who wants to pursue a PhD, says the STEM horizon is infinite, a message she shares with other students as a peer mentor.

“The Mount has empowered me by not only giving me a voice, but helping me find something to say,” she says. “And if not for the help from scholarships, I would not be able to complete my college education.”

It all adds up: big dreams plus support from faculty and scholarship donors equals success.

“To me, being unstoppable means persevering. With all the support here, it was impossible for me to give up,” Olivares says.
I give to the Mount because I want to see young people succeed. Here, young women are given the chance to do what they want to do, to follow their dreams, and I want to support that.”

Dianne Plou Schautschick ’65
Regent, alum and donor

I hope that I can repay the people who have made my education possible by becoming the best nurse I can be.”

Kennedy Davis ’20
Nursing major

My scholarship helped me to achieve my academic goals. It also gave me confidence knowing that there are people who believe in me and the other students of Mount Saint Mary’s.”

Celine Gomez ’17
Religious studies major

PAYING IT FORWARD

As one of hundreds of scholarship recipients, Claire Atanacio ’19 knows that someday she wants to do the giving.

“I promise to continue to extend this gift and sponsor another student one day,” she says. Atanacio received the Class of 1965 Endowed Scholarship and the Dorothy Von Der Ahe Endowed Scholarship.

Atanacio wants to follow in the footsteps of her parents, both nurses. Since her first year at the Mount, she has felt challenged to grow and learn, as well as to serve with compassion. She credits her faith in God for bringing her to the Mount and helping her overcome obstacles while here.

Outside of the classroom, Atanacio has been involved with many campus clubs, including the Fellowship of Christian Athenians and Pangkat Pilipino. As a resident assistant, she has been able to strengthen her leadership skills. She understands what first-year and second-year students are going through, and she is able to connect with them in order to help them navigate college life.

After graduation, she plans to travel as a missionary worker to provide care all over the world.

Mission Statement
Mount Saint Mary’s University offers a dynamic learning experience in the liberal arts and sciences to a diverse student body. As a Catholic college primarily for women, we are dedicated to providing a superior education enhanced by an emphasis on building leadership skills and fostering a spirit to serve others. Our measure of success is graduates who are committed to using their knowledge and skills to better themselves, their environments and the world.
