THE 2017 REPORT ON THE STATUS OF WOMEN IN LOS ANGELES COUNTY was commissioned by the Los Angeles County Commission for Women (LACCW) and prepared by Mount Saint Mary's University. The data included in this update provides a portrait of the wellbeing and status of women and girls in L.A. County on a variety of economic and social indicators.

The previous report in this series (*The 2016 Report on the Status of Women in Los Angeles County*) identified a number of positive trends as well as persistent challenges facing women and girls here.

Several trends evident last year have continued in a positive direction:

- Ninety percent of women and girls have health insurance, an increase of 4 percentage points in the last year and 10 percentage points since 2010.
- Employment continued to recover from the Great Recession, with the 2016 L.A. County unemployment rate for women falling to 5.6%, its lowest in 10 years.
- Roughly 105,788 fewer women lived below the poverty line in 2015 than in 2014, as the poverty rate fell 2.2 percentage points between 2014 and 2015.
- Young women today are staying in school longer, graduating high school and going to college and beyond at significantly higher rates than women of previous generations.

Nevertheless, women and girls in L.A. County continue to experience significant hardships and gender disparities persist.

- Although the poverty rate declined for every demographic group of women in L.A. County, nearly a quarter of Latinas and African-American women live below the federal poverty line.
- Women in the county earn just 81 cents compared to every dollar men make.
- Roughly one in three of the county's homeless individuals are women.
- More than 41,000 domestic-violence related calls for assistance were made.

In this document, you will find highlights from the 2017 update (also available as a downloadable PDF), followed by data and tables on the condition and status of women and girls in L.A. County.

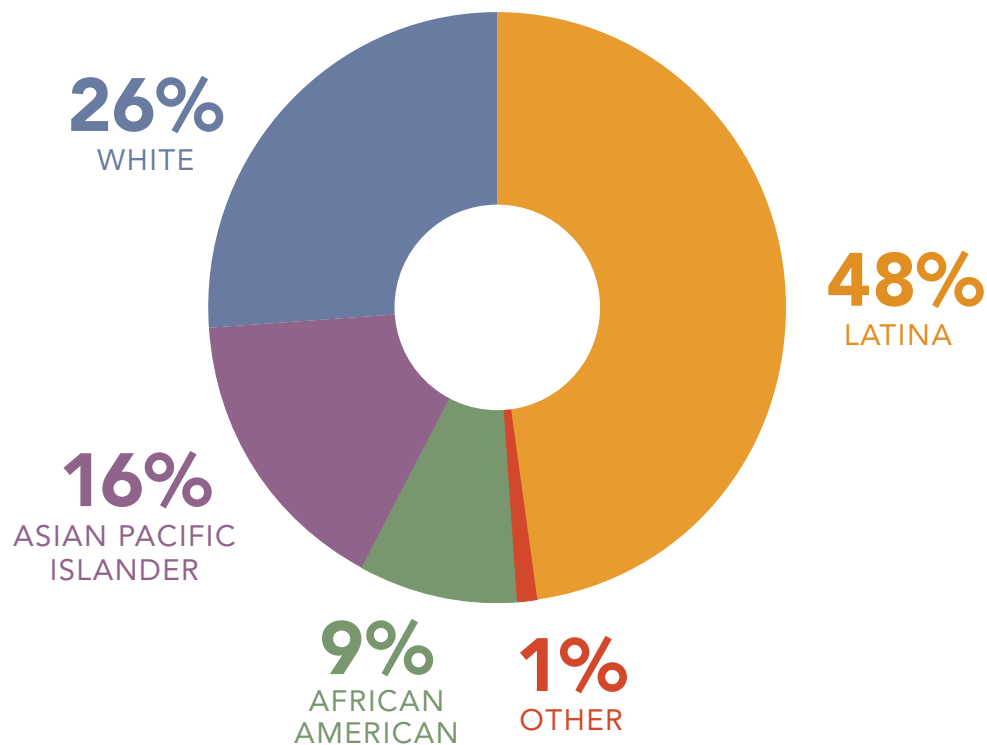

As part of fulfilling the educational mission of the Commission for Women, the LACCW plans to issue full Status of Women reports biennially, with updates on key topics and indicators in the interim years. We encourage you to read and share this 2017 update, as well as the full report published in 2016.

3. Economic Wellbeing

Women-Owned Businesses

The metropolitan Los Angeles area (which includes Los Angeles, Long Beach and Santa Ana) has an estimated 635,000 women-owned businesses, second only to the New York, NY/NJ metropolitan area.⁸ As of 2016, California is home to nearly 1.5 million women-owned businesses, more than any other state in the nation.

Women-owned businesses in the Los Angeles area employ 439,000 people and have an annual sales revenue estimated at \$94.8 billion. Since 2007, the number of women-owned businesses in the Los Angeles metropolitan area has increased by 55%, employment by 13% and sales revenue by 19%.⁹

Unemployment

The unemployment rate for women in 2016 was 5.6%, its lowest in 10 years.

LOS ANGELES COUNTY

The 2017 REPORT ON THE STATUS OF WOMEN IN LOS ANGELES COUNTY was commissioned by the Los Angeles County Commission for Women (LACCW) and prepared by Mount Saint Mary's University. This report provides information on data and trends in order to assess how women and girls in our county are faring across a wide variety of economic and social indicators. We present this report as part of the educational mission of the LACCW, as well as to help guide the efforts of LACCW and County leaders in addressing the interests and concerns of all L.A. County women and girls. Data in the report are based primarily on the most recent statistics released by the U.S. Census Bureau in its 2015 American Community Survey.

The Los Angeles County Commission for Women (LACCW) represents the interests and concerns of women of all races, ethnic and cultural backgrounds, religious convictions, social circumstances and sexual orientation. For more information, visit LACCW.LACOUNTY.GOV
