

BS Sociology Program Learning Goals and Outcomes

PROGRAM LEARNING GOAL	PROGRAM LEARNING OUTCOME
<p>Learning Goal 1 Mastery of sociological theories and application of them, which involves building skills in complex analytical analysis. It requires that students understand and effectively apply theories on human behavior and interaction to real life circumstances in society, both historically and contemporarily</p>	<p>Learning Outcome 1.1 Students will demonstrate and master the three major theoretical schools in sociology</p>
	<p>Learning Outcome 1.2 Students will demonstrate the ability to apply sociological analysis to the real world</p>
<p>Learning Goal 2 Mastery of social science research methods so that students will be able to identify and define a research question, determine research strategies, develop hypotheses, implement the strategies, and draw conclusions from their original research projects</p>	<p>Learning Outcome 2.1 Students will master quantitative research methodology</p>
	<p>Learning Outcome 2.2 Students will be able to use SPSS data analysis software</p>
<p>Learning Goal 3 Mastery of an understanding of human rights as specified in the United Nations Universal Declaration of Human Rights (UDHR)</p>	<p>Learning Outcome 3.1 Students will be able to identify and assess violations to vulnerable populations</p>
	<p>Learning Outcome 3.2 Students will be able to advocate on behalf of violations to vulnerable populations</p>
